apollo 15

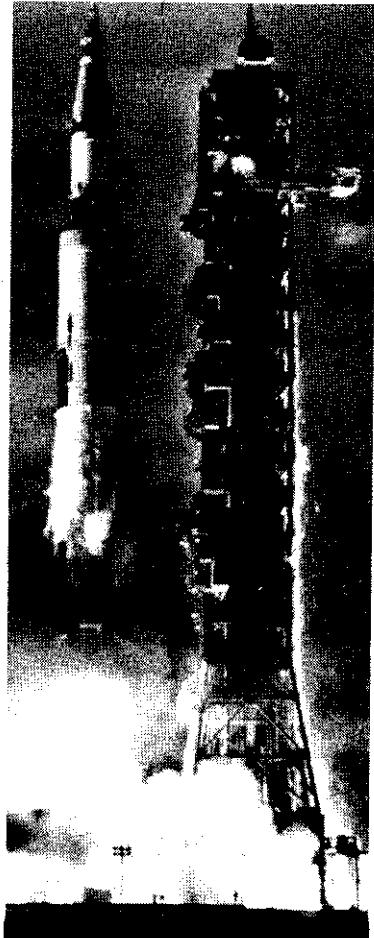

blasts off

America's Apollo 15 blasted off into space last week carrying astronauts David Scott, Alfred Worden and James Irwin off to what will be man's third landing on the moon.

Scott and Irwin will make the exploration of the moon's surface while Worden will orbit the moon in the command ship Endeavour - named after the ship used in Captain Cook's scientific voyage 200 years ago.

Scott and Irwin will travel 22 miles over the moon's surface in the 'moon buggy' to collect rock and mineral samples.

Apollo 15 will cost almost \$400 million which is \$39 million more than Apollo 14.

nixon to visit china

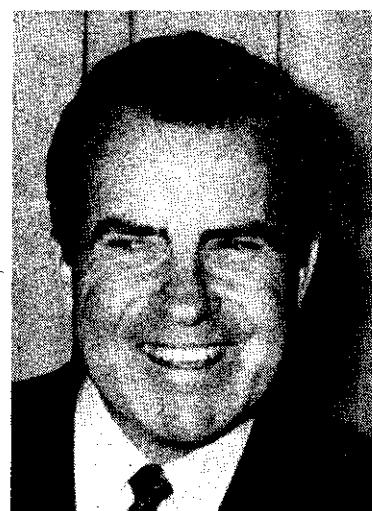

This week the President of the United States, Richard Nixon announced that he would go to China to meet with Chairman Mao and China's premier Chou En-lai.

He is the first American president ever to visit the Chinese head of government.

President Nixon hopes to discuss world peace with Chairman Mao, especially such points as the Viet Nam War and American relationships with China.

China is the third largest country in the world. It covers over three and a half million square miles and the population is over 750 million people.

China is ruled by a Communist government from the capital Peking and the chairman or leader of the Communist party is Mao Tse-tung, one of the most politically powerful men in the world.

Richard Nixon - first U.S. President to visit China.

The chief exports of China are rice, wheat, corn and cotton. China has the world's second largest vegetable crop. The farmers collect animal manure and human waste and use it as fertilizer. Nearly half of China's farmland is irrigated - water flows to the farmland through a system of canals from rivers and lakes.

Many languages are spoken throughout China. As in New Guinea, a single village may have its own 'tok ples' which is not understood by other villages.

Premier Chou En-lai (small picture) and Chairman Mao, one of the world's most powerful men.

Mao has been head of Communist China since 1949.
