## SPECIFICATIONS OF WATCH OFFERED IN THIS BULLETIN

The following are detailed specifications for this nationally advertised watch. (A) TYPE: Genuine Amphibian—ideal for use on land, underwater, or in space. (B) CASE: Standard diameter—measuring 1 1/4 inches across. Ruggedly made with a special Bolt-On back of 100% stainless steel, burnished to a satin finish. Latest Astronaut-inspired design. (C) WORKS: Precision Swiss parts assembled in a renowned factory in TRAMELAN, Switzerland. Movement has integrated calendar section that changes date every 24 hours at

the stroke of midnight. Works are inspected and electronically timed before insertion into the case. (D) WATER RESISTANT: This amazing watch is water resistant (not just "semi" water protected). User needs only to keep crown, case and crystal intact to preserve water resistance. Special internal rubber seals keep out water, dust, grime and grit—the four great enemies of watches. (E) BUILT-IN RESISTOR: This device gives positive resistance against damage from shocks, rough usage, jolts, etc., etc.
