Engine performance and operator comfort maximise production.

### Smooth, Easy Controls

- Two hydraulic joystick controls require only minimum wrist/hand movement, greatly reducing operator fatigue.
- Auxiliary hydraulics are actuated by a thumb-operated rocker switch on the joystick.
- Hand-throttle allows you to run at a constant speed, or an accelerator pedal can be used during load and carry, excavating or backdragging.

### Operator Comfort

- Optional suspension seat adds operator comfort.
- Clear view of the work tool reduces operator fatigue and increases productivity.

### Power and Versatility

- The Cat 3034 Engine is proven and reliable.
- Powerful hydraulics deliver outstanding lift and breakout forces.

## IMPORTANT EARLY NOTICE FOR PRIVATE SECTOR EMPLOYERS

### EMPLOYEE & EMPLOYER CONTRIBUTION RATES INCREASE IN 2005

I draw to the attention of Private Sector Employers that mandatory superannuation contribution rates will increase from 1 January 2005. This will require forward planning by Employers to ensure a smooth transition to the higher contribution rates.

At 1 January 2005, the private sector employee contribution rate will increase from 5 percent to 5.5 percent. The employer contribution rate (on behalf of the employees) will increase from 7 percent to 7.7 percent.

The schedule of changes to superannuation contributions is set out in Superannuation Regulation No. 4 of 2002 as certified on 6 April 2002. The scheduled increases are as follows:

Minimum Contribution Rates	Current	1- Jan-05	1- Jan-05
Private Sector - Employee Contributions	5.0%	5.5%	6.0%
Private Sector - Employer Contributions	7.0%	7.7%	8.4%
Public Sector - Employee Contributions	6.0%	6.0%	6.0%
Public Sector - Employer Contributions	8.4%	8.4%	8.4%

Currently public sector workers have higher mandatory contribution rates than their private sector counterparts. This will start changing on 1 January 2005. Contribution rates will rise to a mandatory minimum of 5.5% from the Private Sector employee and 7.7% from the Private Sector employer - an increase of 1.2% in total. There will be a further rise in 2008 to bring the private sector into line with the public sector.

The Private Sector employers have three (3) months before the increase in the contribution rates come into effect on 1st January 2005. This gives companies sufficient time to advise employees and to prepare for a smooth transition to the new contribution rates.

The superannuation industry is a vital cornerstone for the development of Papua New Guinea. We need to maintain a broad consensus on the direction of superannuation going forward.

## Accelerating Girls Education (AGE) in Papua New Guinea

**E**ducation is vital to ensuring a better quality of life for all children and a better world for all people. But if girls are left behind, those goals can never be achieved. Educating girls yields spectacular social benefits for the current generation and those to come but many villagers in Papua New Guinea, which comprise 70 percent of the total population, are not convinced about this. Some of the benefits of an educated girl are; the children she does have will be more likely to survive; they will be better nourished and better educated. She will be more productive at home and better paid in the workplace. She will be better able to protect herself against HIV/AIDS and to assume a more active role in social, economic and political decision-making throughout her life.

In realizing this need UNICEF in partnership with Governments and civil society, launched the '25 by 2005 Girls' Education Campaign' in 2003 to accelerate its ongoing efforts towards the world's commitment of educating every child.

Papua New Guinea is one of these 25 countries and is the only one in our region because the status of girls' education is poor. Many girls in PNG do not enroll in schools due to cultural, social, economic and other factors and

those that do enroll drop out of school for various reasons. One of the main problems is that of school fees. Many parents are not supporting the education of girls. Thus, the campaign in Papua New Guinea focuses on getting most of the school-age girls into school and retaining them until they complete their primary education.

The Accelerating Girls' Education (AGE) initiative of the National Department of Education and supported by UNICEF is a step forward aimed at getting more girls into schools, ensure that they stay in school and that they are equipped with the basic tools they need to succeed later in life. The AGE program is part of the Government's on-going efforts to ensure every girl and boy exercise their right to an education and promote gender parity, a major concern in Papua New Guinea.

The program is piloted in six provinces (WHP, Simbu, EHP, Morobe, Madang and East Sepik) and will be extended to other provinces subsequently. The results so far are impressive. About 85 percent of the total numbers of girls who have left school this year have returned to school.

Advocacy and awareness campaigns through various media outlets and through our partners, districts and school authorities and Provincial AGE

Committees are proving successful. Focus group discussions have identified a lot of problems faced by girls, mostly in remote districts and these kinds of information have helped the AGE Team to design specific strategies and activities to break through some century old barriers which may otherwise be difficult.

The positive responses from the communities so far are clear testimonies of the realization of the need for equal participation in education and in the development of the community and the country as a whole.

With girls' education as one of its priorities, UNICEF is supporting the National Department of Education, other government entities, the churches and a range of other partners to achieve robust and sustainable gains in gender parity in primary education in the country.

And by this the benefits of education will be passed from one generation to the next, the futures of those that follow will be much brighter too and in the end benefit the country as a whole.

# Parents participation in their Catholic Education

Saint Joseph's International Catholic School - the School of Faith and Family is an independent Catholic Primary School, (Pre School to Grade Eight) that is owned by the Catholic Archdiocese of Port Moresby. The School operates within a framework of a vibrant, dynamic School Board established by the Archdiocese Catholic Education Agency.

An enrolment of 610 students. St. Joseph's is continually encouraging the parents of the students to participate in their child's education. This has been done this year at St. Joseph's by regular parent/teacher meetings, parent/teacher interviews.

Daily contact with parents through the Students Home Diary is another very useful and vital link with parents. St. Joseph's believes it is of the greatest importance that school and parents must work and cooperate in close partnership. St. Joseph's has nominated this partnership as an urgent priority. Far too easily can parents be left out of the educational equation. Parents are very much part of the Christian Life Program of the School.

By enrolling their child at Saint Joseph's, parents have made a wise investment and expect a benefit as a result of their investment.

As teachers we should recognize that parents of a strong united family can be well positioned not only to give support to their child in difficulties but also to build strong characters in their children from the earliest years.

The early years are the most important. As teachers we have a line into hundreds of homes. In fact we are ideally situated to access families.

We can therefore deliver support to parents and create support networks for parents. We who lead schools can decide we already have enough to do, or we can take up the challenge.

There is practically no parent who does not wish to be the best father or mother he or she can be. As educators at St. Joseph's, we support and share with parents the all-important crucial responsibility of educating and

caring for their children, assisting them to realize their future destiny as Christian Citizens and Leaders of Papua New Guinea.

At Saint Joseph's we care about the children, not just their education. The School has built a strong reputation on caring for every aspect of children's well being - body, mind and spirit. At St. Joseph's we are deeply concerned in the all-round development of children.

In addition to a strong academic program students are offered a wide, diverse range of cultural, sporting, community and spiritual opportunities which enables the children to graduate with foundations of vision, integrity, understanding, compassion, tolerance, cooperation, honesty and prayerfulness.

Choosing the Right School for your children is so important. A school where students pursue individual growth. A school that encourages personal endeavour and the development of talent in academics, sport, arts, based on Christian values - gospel values. A school that respects individual differences but expects everyone to uphold a philosophy of care, respect and tolerance. St. Joseph's is just that school.

A School of Faith and Family with a balanced education. An education which will guide students to progress towards the attainment of their full potentials as individuals and valued members of society.

Top schools are a source of inspiration. Great schools are the results of great teachers whose commitment as Educators develops an inclusive school culture of learning.

Every week is Education Week at St. Joseph's. We celebrate Education Week forty times during the year. We are open everyday -never closed because of water, electricity, teachers failing to turn up for duty.

At St. Joseph's, we want parents to realize their dreams of Catholic (Christian) Education for their children.

## CATHOLIC EDUCATION

What can you expect to see in a Catholic School?

- + children being educated in the faith and traditions of the Catholic Church
- + happy children and staff
- + an environment that is caring and peaceful
- + committed and caring staff
- + effective religious education programs
- + prayer and liturgical celebrations
- + attention to children with special needs
- + children who question "Why?" and "How?"
- + innovation
- + professional staff
- + quality in all learning areas
- + constant evaluation

## STAFF WITH COMMITMENT

Commitment and dedication are the words that come to mind when one thinks of the staff in Catholic Schools.

Called to share their Christian lives with others they believe and live out to the best of their ability the values, messages and ideals that they are teaching.

Professionally trained, they recognize the need for constant professional and spiritual development so that they are conversant with curriculum changes and innovations in education. Most importantly, there is a great sense of care for each child as teachers work with parents to develop the potential of every child in their class.

**BANK OF PAPUA NEW GUINEA**

## KINA FACILITY RATE FOR OCTOBER 2004

In the first nine month of 2004, the country has witnessed stability in the exchange rate, lower interest rates, lower inflation rates and a strong build up in foreign exchange reserves. This has led to expectations of lower future inflation and provides an enabling and conducive environment for private sector investment. Continued sound fiscal management has also enabled the Government to record a Budget surplus of 2.6 percent of Gross Domestic Product (GDP) in the first eight months of 2004. The Bank encourages the Government to continue to redirect these savings to development expenditure in order to generate sustainable economic growth in future, whilst restructuring its debt portfolio.

**THESE ARE POSITIVE INDICATORS AND THE BANK OF PNG ADVISES THE PUBLIC THAT IN PASSING ON THESE BENEFITS THE KFR IS REDUCED BY 2.0 PERCENTAGE POINTS TO 7.0 PERCENT FOR OCTOBER 2004.**
