JICA Bridge project will greatly benefit Bougainvilleans

....Project on target

By Veronica Hatutasi

OVER 200,000 people in the Autonomous Region of Bougainville (ARB) will reap huge development and economic benefits from a K86.5 million Japan grant aid bridge project on the island, once it reaches completion early next year, 2012.

The Japan International Cooperation Agency (JICA) Project for the Construction of Bridges on the Bougainville Coastal Trunk Road (PCBBCTR) is on schedule for the completion target by next year March, during which 15 bridges currently under construction over large fast flowing rivers between Buka, Wakunai and Arawa, should all be completed.

And vehicles transporting people from the southern tip of the island past the central region and on

to the northern part of the island to do businesses and transport cash crops and other produce destined for sale at the relevant Buka market outlets, would be guaranteed smooth travelling effectively cutting travel time by 1 hour.

With four months to go before the March 2012 target, work on this major project is progressing very well and already 7 bridges have been completed, while the rest are either almost, half way or partly done.

Recently, we had a chance to visit sites of the PCBBCTR as well as health and education projects funded by JICA and the Embassy of Japan.

The PCBBCTR trunk road project is implemented by JICA and three counterpart agencies of Papua New Guinea including the Departments of Planning & Monitoring,

Works and the Autonomous Bougainville Government (ABG).

As a result of destruction to vital infrastructure during the Bougainville Crisis and the subsequent non-maintenance of the coastal trunk road for just over 20 years, the roads and bridges have deteriorated, but the Japanese government has come in timely to assist as part of its kind contribution towards the reconstruction and peace process in the ARB and also, as a token of friendship and cooperation between the people of Japan and PNG.

Under the guidance, advise, supervision and leadership of the Consortium of Chodai Ltd and Eight-Japan Engineering Consultants Inc, a Japanese contractor, the Kitano Construction Corporation is working on this world class bridge construction work which has a durabil-

ity and a lifetime of 100 plus years, depending on the whims of mother nature and in a place such as Bougainville where it rains all the year round.

Apart from the engineers and contractors from Japan, Thailand and the Philippines, the project recruits locals from the project sites to assist in the building and construction work.

Maintenance and sustainability of the bridges is of utmost importance, and according to Yoshikazu Taniguchi, the Assistant Residential Representative of JICA in Port Moresby, it will be the responsibility of JICA at first however, it will gradually hand over (the responsibility) to the ABG.

Mr Taniguchi also said that it will train officers from the ABG on the maintenance and sustainability aspect of the Bougainville bridge project.

We visited selected bridge project sites between Tinputz, Wakunai and Arawa including Rawa Bridge No 15 still to be completed, Iraka River Bridge, the longest, covering 75 meters and a few others, in order for the reporters to observe, ask questions to the engineers and contractors and take photos on the work done.

We also visited Wakunai and Hahela Primary schools, which are two of the Embassy of Japan supported Grassroots Grant Aid Project and JICA funded EQUITV Project in the ARB and expressed satisfaction that while the Science and Maths TV televised education programs are greatly assisting students and teachers in their learning process, the parents and communities within the schools peripheries have taken ownership of the sustainability

and maintenance of the project.

Visited also were Buka Hospital which uses some of its vital life saving medical and X-Ray equipment donated over the years by the Embassy of Japan and where one JICA Physio-therapist volunteer is working for. The JICA Embassy of Japan donated machines and generators for the Kubu Power stations which provides electricity to the Buka township, Kokopau, Hutzena, Sohano and neighbouring health, education, church and business facilities.

The officers had discussions with the relevant authorities of the power house, health and education institutions on the progress, needs and problem areas which the two officers noted for consideration pending reports to their relevant heads of missions.

1: THE ULTIMATE SIGN: Standing tall and proud in the project areas is this sign post carrying the message of this K86 plus million Kina development in partnership between the governments of Japan and PNG.

2: COMPLETED: Tuve Bridge No 3 is one of the 7 already completed.

3: STILL UNDER CONSTRUCTION: Rawa River Bridge No 15 in the Tinputz District is the 1st on the Buka Arawa section of the road.

4: ENGINEERS & CONTRACTERS: Some of the engineers & contractors at a work station.

5: IN DISCUSSION: Hahela Primary School headmaster, Talania Joseph Nathaniel and EQUITV Project Manager, Daniel Kukup in discussion on the progress and future of the project with JICA's Yoshikazu Taniguchi and

Embassy of Japan's Heigo Nakafusa.
6: WITH BUKA HOSPITAL MANAGEMENT: Messrs Nakafusa & Taniguchi meet with Buka Hospital CEO, Dr Cyril Imako, Medical Superintendent, Dr Barnabas Matanu and the Matron.

7: BRIDGE OVER THE RIVER KAPIS: Another of the longest bridges at Wakunai, Bridge No 13, still under construction.

8: WAKUNAI EQUITV: Grade 8 students welcome the Embassy of Japan and the JICA team dropping in briefly at the Wakunai Primary School to check on the progress of the EQUITV project.

9: EQUITV: Grade 8 students at Hahela Primary School un Buka benefit from JICA sponsored EQUITV Science & Math Programs
