Post Title:

Project Administrative & Financial Assistant (PAFA)

Project: Community-based Forest & Coastal Conservation and Resources Management in PNG

Duty Station: Department of Environment and Conservation, Port Moresby

Duration: 1 year (with possibility for extension)

Type of Contract: Service Contract

Starting Date: October 2012

Project Background:

Conservation in Papua New Guinea is hindered by a combination of systemic and policy barriers to effectively manage Protected Areas in combination with the capacity and economic development barriers at the local (community/clan) level that directly affect the decisions communities make about the use of their natural resources. The challenge lies in devising resource-allocation decision-making models that allow communities to fulfill their income needs and developmental aspirations, while ensuring that a viable, representative proportion of the country's terrestrial and marine resources are conserved for national and global environmental purposes. The only mechanism by which these two goals can be aligned is through the model of community-based conservation areas. However the large-scale establishment of such CCAs is hindered by the range of policy, capacity and financial barriers described above. Therefore, the Department of Environment and Conservation (DEC) in partnership with UNDP will implement the Global Environment Facility (GEF) funded "Community-based Forest and Coastal Conservation and Resource Management Project in Papua New Guinea". The overall objective of the Project is to establish a system of effective terrestrial and marine protected areas which builds upon existing community-based resource management structures for Whiteman and Nakanai Ranges on New Britain Island and Owen Stanley Range sections in Central and Northern Provinces.
