Promoting Effective Public Expenditure in PNG

2013 NATIONAL BUDGET FORUM

7 February 2013 | NRI Conference Centre | 9.00am-2.00pm

THE National Research Institute (NRI) and the Australian National University (ANU) Development Policy Centre are jointly undertaking a three year Promoting Effective Public Expenditure in PNG (PEPE) project on how PNG allocates its public money. This will include an analysis of the effectiveness of its public expenditure in key service delivery sectors. The objective of the PEPE project is to inform PNG's political and bureaucratic leadership, civil society and the general public of current levels of service delivery performance, and influence allocations and expenditure rules to promote better allocations and more effective and transparent expenditure. The PEPE project consists of two inter-related research components.

Budget Analysis – This component focuses on understanding how PNG allocates its public resources at a macro level. The approach is to facilitate systematic and ongoing analysis of key aspects of the PNG budget, including the allocation of funding between the development and recurrent budgets, between and within sectors, and between levels of governments.

Understanding Local Expenditure Dynamics – This component focuses on how a number of key expenditure reforms perform in terms of getting funds and resources to the local level, and the factors that explain the observed performance at this level. The expenditure reform areas proposed for analysis are facility grants to schools, textbook distribution and outsourced drug provision to health facilities. The findings of the PEPE project will be presented at bi-annual budget forums.

The focus of the **Budget Forum** on 7 February is to support the implementation of the 2013 National Budget so that better outcomes are achieved for the people of PNG. According to the 2013 National Budget, expenditure will increase by over K13 billion – an overall increase of 23 per cent – with the aim of substantially improving service delivery in the priority sectors of health, education, transport infrastructure, and law and order. Despite this, the general view has been that large budgets over the last ten years have seen limited impact on the ground with worsening infrastructure and socio economic indicators.

Key speakers at the forum will explore why previous efforts to improve service delivery in the past were ineffective, and identify corrective measures for Government to adopt in order to ensure that the 2013 and future budgets are more effectively managed to realise desired outcomes.

The Forum will also include a session on a recently completed PEPE survey of education and health facilities across 8 provinces in PNG. Members of the PEPE survey team will discuss their experiences in the field in relation to the opportunities and challenges faced in the frontline of service delivery in PNG.

All welcome to attend, but by prior reservation: Contact Andrew Mako on Email: amako@nri.org.pg or Ph: 326 0300 Ext.331 or Eunice Kivan on Email: ekivan@nri.org.pg or Ph: 326 0300 Ext.345.

FRIENDS TO ALL ENEMIES TO NON!

Life at that military level is like that of two or three dogs watching a single bone and when one makes the attempt for the bone, all the others are on their feet to prevent that from happening.

The above was the slogan cum foreign policy was pushed by the early Somare Government during the period of "self government" in the early seventies before independence. And at that time the foreign minister was the late Sir Ebia Olewale. We are told that the present government has adopted the above slogan as a basis for its foreign policy in its meeting at Alotau just before formation of the government last year.

A country's foreign policy is in essence that particular country's domestic policy on how it ought to conduct or culture its relationship with a foreign country. And given the multi facets of life on the international scene, it is quite a complex subject to deal with so that one cannot easily adopt a slogan such as the above as a foreign policy and blindly walk into the arena. Each subject matter would require a different treatment and cannot be given the same label and then ignored.

Take for instance, international obligation contracted to under the Merchant Shipping Act of 1894 (UK) which we adopt upon Independence. There are numerous Conventions which are part and parcel of this piece of legislation which require us to incorporate into our domestic legal order for enforcement as part and parcel of our domestic ways. One such requirement at this moment is the switch from heavy diesel (carbon 300) to light diesel (carbon 500) which is more environmental friendly, and ignorant as we are, we licensed Interoil to produce the heavy diesel that the international community has abandoned in favour of the lighter diesel. The newer ships engines too are now designed to burn lighter diesel and where are we on this subject as we do the –merry-go-around singing, "friends to all and enemies to non?

We are way behind and lag-

ging in our endeavour to keep pace with the international community. The treaties division of the Department of Foreign Affairs should take the lead to liaise with the Department of Justice and Marine Division of the Department of Transport to put in a place a working committee to review our position and work towards ensuring compliance so that we reach a position where we are up to date with our international obligation as a country.

And in matter of Defence, where are we at this moment? Do we have a Defence Treaty with Australia, New Zealand and US? And what is our relationship with Indonesia, Singapore, Malaysia and the Philippines and the Asean Community at large on the matter of Defence? And if we are to be prepared against any aggression then most likely it will come by way of West Papua Rebellion where Papua New Guinea will be unwillingly dragged into the conflict because the Papuan will be using PNG side of the border as a safe haven.

This is where the present policy by Papua New Guinea to recognize West Irian or West Papua as an integral part of the Republic of Indonesia is relevant and to an extent highly appropriate. Whilst we may sympathize with our Melanesian brothers at the other side of the border, we are bound by history which we cannot ignore and must recognize that the Republic of Indonesia has sovereignty over its territory that includes West Irian and that is the life that must be respected at both the international level and also the domestic level.

However, that does not mean that we must play the blind when it comes to mistreatment by Indonesia, if any, on the West Irian people. If and when we sight evidence of any mistreatment of these people, we must adopt a position, dictated by our conscience and tell Indonesia in no uncertain terms that we disapprove based not only on the UN Charter on Human Rights but more closer at home, these are our Melanesian brothers and we cannot ignore their being mistreated and that way we must voice our dissent in no uncertain terms.

This is why our relationship

with Indonesia is a rather tricky one, for lack of a better statement. This where in anything we do we must be preceded by a lot of thinking and ground work because the subject is rather delicate. Indonesia is a nation of a thousand islands or more no larger than New Britain or New Ireland thus its rule over these islands is rather tenuous at that superficial level. And also face the similar problem and this has been exacerbated by the Moslem uprisings on different islands.

What the above must tell us as a close neighbour is that these countries are "militarily alert" to switch into gear and move into action to quell and major uprising by any single group should the individual country's sovereignty be threatened in way of form and from any source be it internal or external.

Just take a look at Japan, China and South Korea and see what happens when a fishing boat flying one national flag is boarded by the navy of another country and fisherman are arrested and taken ashore? Life at that military level is like that of two or three dogs watching a single bone and when one makes the attempt for the bone, all the others are on their feet to prevent that from happening.

Surely, common sense would tell us bystanders that it would be a more plausible scene if these countries were to meet together to trash out a Treaty of sorts to recognize the atolls as jointly owned and if any natural resources like oil were found, that would be jointly exploited and all benefits shared. However, these highly developed countries do not want to talk about it. They want to fight and win by conquest but what about the costs involved?

You would want to ask: What about the costs? But costs is irrelevant. What is irrelevant is "the national pride" of each such country and they will go to full scale war over a tiny atoll to exert that national pride and national pride knows no boundaries and no costs or obstacles. Many of us have read about it in books and seen movie scripts on our TV screens or the Japanese kamikaze pilots crashing their planes on the American Battle Ships during the Second World War.

If this is the kind of mentality of the people we are dealing with then we must caution ourselves of what we are walking into when we are cultivating a relationship with these countries both on the domestic scene and in the international frontier. We must study their history, their culture including their religions and their geography to understand what makes these people who are and what must make them tick.

Do we have such an Organization in place like the Indonesia Think Tank as part of its military and foreign affairs establishment? No we do not have. We suggest that we take another look at the National Research Institute (NRI) and incorporate into NRI, a related establishment to undertake such a role to inform ourselves of people of the other nations that we are dealing with.

Take China for instance, which is by far the biggest trading partner that we now have. The Chinese has done well in this country and it is not without good cause. China has been at the forefront when it comes to the assistance of this country in terms of funding and building of major infrastructure projects like the Sir John Guise Sporting Complex at Waigani. These are highly visible forms of assistance and given that "seeing is believing," many people view these "gifts" with gratitude and appreciation of the Chinese and there are genuine feelings of friendship with the Chinese nationals on all fronts.

When you look at our own history of exposure to the European, we also sighted the Chinaman among them doing menial tasks like cooking and cleaning also for the Whiteman. So there is some form of bonding with the typical Chinaman. And so the social scene, there is open friendship between Papua New Guineans and Chinese.

But how much of China do we know? Again China is not a single race of people. They are a multitude of races who come from different background and different cultures to come under one umbrella. And what makes China what it is today? And when we began courting China with our Look North Policy, were we prepared for what we now have?
