## Water level update

Image courtesy of PNG Power Ltd PR

- Water level continues to drop at the Sirinumu Dam
- Current water level reading is at 167.12mcm (million cubic meters)
- Citywide water rationing is imminent as water level is now at 49 %.
- If the current weather trend continues the water level will decrease further
- It is vital to think conservation and these simple steps will go a long way:
  - Take shorter showers
  - Fix all leakages in / around your premises
  - Do not use running taps for washing clothes, dishes, brushing your teeth, flowers or vehicles.
  - Use water and power wisely.
