National Roads and Infrastructures in PNG

The first flyover project in PNG and Pacific

THE Kookaburra Flyover project in PNG is the first of its kind in the whole of the Pacific.

Despite a slow start last year due to compulsory land acquisition and relocation of occupants and some services, the Project has progressed significantly in the last few months.

The project has clocked over 318,330 man-hours to date with Zero LTI's (Lost Time Injuries).

Majority of the people employed are local to the area (over 120 of the 140 staff currently employed on the

project).

A snapshot of works completed to date:

- All Piling works complete - 40 no. of piles completed out of 40.
- 28 no. columns completed out of 40
- 6 no. headstocks completed out of 20
- 50 no. Super-T's completed out of 133
- 7 no. of Super-T concrete structure has now been installed (see photo).
- Civil works has commenced for the Oriole to Mangu Crescent.

Investment in City roads will reap benefits

CONSTRUCTION and upgrading of all road projects in Port Moresby will tremendously benefit the residents of NCD in the long run despite criticisms from the public.

Chinese Ambassador to PNG, Li Ruiyou revealed this at the ground-breaking ceremony of the Hanuabada to Gerehu and Gerehu to 9 Mile road projects at Gerehu recently.

Ambassador Ruiyou said China started its economic development by investing heavily on roads and infrastructures in the early 1980s and now China is one of the world economic superpowers.

"To experience development and prosperity you must first construct more roads. When road connects every provinces and communities in PNG you will see companies come to do their businesses and also having access to health, education and social services will become possible. I would like to commend NCDC for taking the initiative to invest on roads and infrastructures development in the city because in the long term many economic activities and opportunities will pop up and you won't regret it," Ruiyou said.

NCDC, under the political leadership of Governor Powes Parkop, has taken the initiative to construct and upgrade all major road

networks in Port Moresby and they include the 8Mile to 9Mile road, 6Mile to 7Mile road, Paga ring road, the Kookaburra flyover bridge and the Hanuabada to 9Mile road among others. In recent weeks some of these projects have come under attack from the public and prominent citizens who criticised the Commission on the amount of monies used to construct those roads which cost millions of kina.

Minister for Health and HIV and Member for Moresby North-West Michael Malabag, however defended NCDC's decisions to invest big time in roads and infrastructural developments in the city.

"Our population in NCD has increased drastically which has put a burden on the limited amount of services we are providing in the city. It has affected the working class people and students who go to work and school daily. Traffic jam happens almost every day in NCD and therefore construction of these major roads and access roads will ease the flow of traffic in the city therefore, we have to invest millions of kina into it for the benefit of our residents before the issue gets out of hand," Mr Malabag, who is also a Commissioner on the NCDC Board, said.

We ensure high Standards of Practice;

Providing innovative, efficient, civil construction services to Papua New Guinea

Government focused on linking all for greater opportunities

THE Government has remained in its focus to ensure all basic roads and infrastructures throughout the country are improved and maintained under its theme, '**accelerating implementation**' this year.

During the PNG Business Council breakfast at Crown Plaza this year, Prime Minister Peter O'Neill announced his governments focus and commitment in delivering and improving basic services throughout the country which road and infrastructures has received a huge funding of K4.35 billion.

This funding will allow basic roads, bridges, wharves and jetties to be built in the communities and

districts that don't have access to any before while maintaining and upgrading existing ones that have deteriorated over the years.

The allocation is made available to the Provincial Support Improvement Program (PSIP), District Support Improvement Program (DSIP) and the Local Level Government Support Implementation Program (LLGSIP) to carryout in their respective communities and districts.

Over K2 billion has been allocated for roads this year and over K12.1 billion over the next five years under the O'Neil/Dion Government.

Some of the projects are NCD Roads over K100 mil-

lion, Central province received K30 million for road upgrading, Morobe was allocated K128 million for Lae roads upgrading from two to four lanes, East/West New Britain road link at K10 million, Southern Highlands to Gulf road link for Erave – Sembirigi to Kikori at K10 million, Jiwaka province a commitment of K300 million over three years, Jimi – Banz highway gets a total of K3 million for construction, upgrading and further maintenance. Highlands roads have spent over K214 million for the road upgrading.

"The focus is to open up the country for greater opportunities", said Mr O'Neill.

Country Manager of Global Construction, Mr Nelson Yano receiving contract documents from NCD Governor, Mr Powes Parkop.

Madang roads to link up in 2017

RURAL roads in Madang province are now getting major boost in upgrading and construction of their road network after thirty years of neglect and rundown. These infrastructure developments will see major improvement in the economic benefits and other service delivery in the province.

The Open member for Madang and the Minister for Petroleum and Energy Nixon Duban is investing in roads development to boost the province economic growth and encourage rural development.

Mr Duban said he sees road infrastructure as an important link to better economic activities and improve health and education services for the people otherwise people will continue to suffer from basic services.

Currently the work has started on Mis-Kamba roads under the funding from Mr Duban's District Support Improvement Program (DSIP) which is nearing completion where he visited and appreciated the government funding to be well used on the project.

Once there is a better road, flow of goods and services will reach everyone and they will be happy, said Mr Duban.

He also presented a K1 million cheque for the South Ambenob local Level Government (LLG) in the Madang District for the Medo to Laga road which he officiated the ground breaking ceremony and urged the contractor to start the road project immediately.

People in that area walked for hours and miles

to reach the main road. Mothers have died from pregnancy and government workers have fled the area because of inefficient government services.

The ceremony broke the hearts of many as they danced and cried after 30 years of getting such vital government services into their community.

Mr Duban then asked the people to make this road usable by producing more cash crops to sell at Madang town and become self-reliant. He challenged them to form Cooperative Societies and seek funds he has made available in the National Development Bank (NDB) rather than relying on government hand-outs.

He believed by 2017 all rural roads in Madang district will be completed.

Lae city roads get major government funding

THE Government is committed to develop all its roads and major infrastructures in Lae City so that it continues to serve and operate as the industrial hub of the country.

Part of this development involves the upgrading of the city roads to accommodate the high traffic volume with four lane roads.

The government's focus is on the 58 km major road network that supports the growing business activity in the city.

The Department of Works has embarked on building

high standard roads through a four year program with a design standard that addresses the adverse local weather conditions and growing traffic demand issues in the city.

The Lae road rehabilitation faced a lot of problems due to the quality of work during stage 1 (2009 – 2010) being substandard and largely influenced by poor design and collapsed due to bad weather and the traffic conditions in the city.

These sections have now been upgraded again as part

of the stage 3 projects.

In stage 2 (2010-2012) the project included additional 19.95km at a total value of K70 million. These contracts were awarded on flawed technical and contractual standards.

These cause major problems in the implementation of those contracts resulting in substandard work output and cost overrun of K140 million.

The O'Neill/Dion government in light of these issues transferred the project management and financial responsibilities to the

Department of Works midway through the implementation phase in 2012. Department of Works has made a substantial turn around with great improvements in the delivery of 19.5km of standard concrete paved roads.

In Stage 3 (2013) projects included additional 26km roads upgrading comprising Air Corps, Kwila, Telikom, Busu, Boundary, Mongola, Malaita, Cassowary, Jawani Orion, Rigel, Igam and Milford Haven roads. These roads include the main cir-

cuit to the Unitech gate. A total of four contracts valued at K269 million were awarded and spread over a two-year period from 2014-2015.

All these projects are delivered on high design standards for concrete pavement with a 60 year design life and a 10 year maintenance warranty period on the pavement.

Stage 4 (2015-2016) projects will include the remaining 6 km section of Milford Haven and 16 km of the industrial centre and other ar-

terial roads. These roads will be tendered by the end of 2014 as they are still in the design stage.

Twenty six kilometres of high standard concrete pavement roads are under construction with a 60 – year design life and 10-year maintenance warranty.

All these contracts are progressing on schedule and budget.

Department of Works has made several interventions to ensure the delivery of high quality roads reflects the value for money.
