NOTICE TO ALL FUND RECEIPIENTS RE:INCOMPLETE AND NON ACQUITTALS 2012-2014

NGCB Audit investigation revealed that majority of the projects funded by Community Benefit Fund were either not acquitted at all or were only partly acquitted. Fund recipients are only advising the Board by way of a written letter confirming receipt and monies expended as the expenditures instead of attaching the actual receipts as the usual practice to account for monies expended. Audit could not consider such letters as the actual acquittals and not acceptable.

In the absence of proper receipts this may indicate that some expenses could have been for personal use and abused by the fund recipients. It is the responsibility of all fund recipients to provide an Acquittal Report for the use of public funds, demonstrating that the funding has been used for the purpose for which it was provided in compliance with accountability requirements.

Your Acquittal Report should entail the following:

- 1) Detail summary of financial break-up of how funds were expended,
- 2) Bank statements of organisations/groups
- 3) Copies of receipts
- 4) Pictures of the actual infrastructure, complete project and
- 5) Brief explanation on how your organisation, community and individuals have benefited this funding.

Audit managed to obtain those acquittals available from January 2012 to December 2014 thus all incomplete and non-acquitted from 2012, 2013 & 2014, must be submitted in full to the National Gaming Control Board by 31st August 2015, in a marked envelope and addressed to:

Chairman
Board of Trustees Community Benefit Fund
National Gaming Control Board
P.O. Box 759
WAIGANI
National Capital District

Note: Failure to lodge your acquittal report may result in legal actions and NGCB not assisting with any future requests.

For further assistance contact our Community Benefit Fund unit on email address; cbf.infor@ngcb.gov.pg or phone no. 320 1907 or fax no. 320 1908.

Quick tips on Symptoms and Solutions to TB

People with TB disease may have 1 or more of these symptoms:
 Coughing for 3 weeks or longer
 Losing weight
 Poor appetite
 Sweating at night
 Fever
 Chills
 Feeling tired or weak
 Pain in the chest
 Coughing up blood or brown-coloured material from your lungs

How do doctors test for TB?

You may need more than 1 test for Tb disease:
 A **Mantoux skin test** can tell whether you have TB germs in your body, even if they are "asleep"
 A **chest X-Ray** can tell whether the germs have hurt your lungs
Sputum culture tests can tell whether TB germs are growing in your lungs

How can I get better?

You need to see a doctor and take special TB medicines to kill the TB germs
 TB germs are strong and live a long time. You will feel better a few weeks after you take the TB medicines. To be sure that all of the TB germs are killed, you must keep taking TB medicines for at least 6 – 9 months
 It is important to see your doctor every month until your TB treatment is finished. The doctor will do tests to be sure you are getting better, ask if you have any problems with the medicines, and answer your questions

What do doctors do to test for?

- * AFB Smear Test
- * TB Quantiferon Gold

TB beyond the lungs...

By Dr. Vemu Sudhir & PIH Marketing

In our previous article, especially that of Dr. Mondia (WANTOK, 26 March 2015), we of PIH emphasized how TB affects the lungs and how the best safeguard is for all those who cough to make sure their mouths are covered when coughing, as the TB bacteria is usually expelled by coughing from the infected person and stays in the air for a while.

Tuberculosis is an infectious disease caused by the microorganism Mycobacterium tuberculosis. It can affect several organs of the human body, including the brain, the kidneys and the bones; but most commonly it affects the lungs (Pulmonary Tuberculosis). The first stage of the infection usually lasts for several months.

During this period, the body's natural defenses (immune system) resist the disease, and most or all of the bacteria are walled in by a fibrous capsule that develops around the area. Before the initial attack is over, a few bacteria may escape into the bloodstream and be carried elsewhere in the body, where they are again walled in. In many cases, the disease never develops beyond this stage - and is referred to as TB infection.

If the immune system fails to stop the infection and it is left untreated, the disease

TB can affect other parts of the body.

progresses to the second stage, active disease. There, the germ multiplies rapidly and destroys the tissues of the lungs (or the other affected organ)

In rare cases, a TB infection may spread to the joints, causing TB arthritis.

The most commonly infected joints include the wrists, ankles, knees, hips and spine. When the bacteria does spread to a joint, typically only one joint is infected.

The affected joint often suffers from stiffness, swelling, tenderness and a decreased range of motion. TB arthritis may also cause a fever and excessive sweating, particularly during the night. The muscles around the joint may experience spasms and may atrophy over time. If the infection is in the spine, the parts of body below the infection may feel tingling, numbness

or weakness.

Farfetched as it may at first seem, PIH orthopedic surgeon Dr. Vemu Sudhir recently had to operate on a patient whose right hip had gotten dislocated because of tuberculosis! In Dr. Sudhir's words:

"He was brought to us with pus discharge from his right upper thigh and a fully bent hip, making him lame. He developed limping since Octo-

ber 2014.

The patient developed deformity in his right lower hip and knee and they were full of fluid. He had severe pain during movement.

By January 2015, he had continuous pus discharge and deformed lower limbs.

He was taken up for surgery during which his femoral epiphysis was slipped... his metatarsal cavity was full of infected tissue...

All this we had thought at first was a case of the infection of the bone, but, after he was made to undergo a Biopsy, it showed that this was caused by Tuberculosis!

The TB germ was what had caused his bone to be infected! So he was put on TB medication.

At present he is doing well and his deformities are slowly getting corrected."

If left untreated, the mortality rates for TB are quite high. 5 in 10 cases would die within 5 years and 2 in 10 would develop chronic infections. While about 3 in 10 do manage to self-cure.

Problem o hevi bilong laip

LAS yia 2014 taim mi stap holide long ples, wanpela de mi bin go wantaim kasen bilong mi long baim kopra.

Em i wanpela man bilong wokim bisnis long baim kopra na narapela kaikai bilong gaden, na bihain em i karim i go long taun na salim gen.

Mipela i yusim yutiliti bilong em i go long planti ples.

Wanpela taim mipela kamap long wanpela maunten ples.

Mipela i mas kalapim bikpela maunten liklik. Tasol taim mipela i no go kamap antap long maunten yet, ka i no inap pulim moa. Taia long baksait i spin tasol. Bikos i no gat hevi bilong em, olsem na taia i no ran i go antap tasol em i spin-spin tasol.

Mipela i stop na kolektim sampela ston arere long rot na pulimapim long baksait bilong kar.

Taim i gat hevi, mipela i draiv i go antap, na i no gat hevi moa.

Nau mi save. Sapos i gat hevi i pulap long baksait bilong ka, ka bai isi tasol i go antap long maunten.

Long dispela eksperiens, mi ken tok, "Problem/Hevi" i no wanpela samting nogut. Nogat. Hevi/problem em i wanpela rot bilong helpim yumi i go antap.

Save o nogat, dispela samting i stap long laip bilong yumi.

Hevi long laip bilong yumi planti taim i bringim blesing long laip bilong yumi.

Sapos yumi no bungim wanpela hevi long laip bilong yumi, yumi bai kamap manmeri i no gat strong long bungim hevi na wari.

Isi tasol yumi bai givap taim yumi bungim hevi na wari long laip bilong yumi.

Planti manmeri i save bungim hevi na wari, ol i save sanap strong.

Bikpela hevi na wari yumi karim i helpim yumi long tingim God long laip bilong yumi.

Long wankain taim, hevi na wari i mekim bilip bilong yumi i go long God i kamap strong na yumi bai no inap punداun o tanim tanim tasol olsem taia bilong kar taim God i karim yumi i go antap moa.

Planti manmeri i mekim gut long wok na laip bikos ol i bin bungim planti wari na hevi.

Planti bisnis manmeri bilong dispela graun, na planti santu i stap antap long Heven wantaim God, i bin bungim planti hevi na wari taim ol i stap long dispela graun.

Jisas yet i singautim yumi i go long em, taim yumi karim bikpela hevi. Em i bai givim yumi malolo.

Yumi nidim wari na hevi long laip bilong yumi tu, olsem na bai yumi kamap strong.

Hevi na wari bai helpim yumi "I go antap", na i no go daun.

"Bihain antap long klaut, san lait i stap".

Dispela em i wanpela tok mi save tokim manmeri i kam long kanseling na konsultasen.

Em i givim strong na hop long ol i no ken givap.

Maski yumi stap long graun i no lukim san, bikos klaut i pasim, tasol bihain long klaut antap, san lait i stap.
