PIH brings to PNG *'Safe and Save –Heart' Surgery*

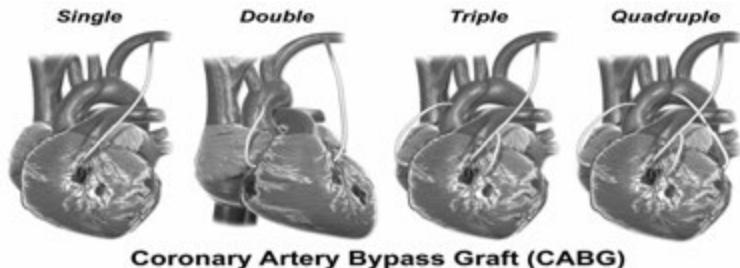

Coronary Artery Disease cuts one down in the prime of one's life.

A valuable life is lost; hard won experience, expertise and ability are lost; the family loses, the village loses, the province loses and the country loses.

All that is preventable. We often hear, or read, that such a life was suddenly, and sadly, lost. But that is equally often not so. Heart disease gives ample warning, but unfortunately we do not recognize the warning symptoms, and signs.

Coronary Artery Disease is patchy, recognizable and correctable. One or several damaged segments, or 'blocks', in our two Coronary Arteries, Right and Left, can be identified and corrected at Pacific International Hospital.

Just as in the past, once again, PIH has brought to POM and PNG gifted, experienced and accomplished hands, that, during the last week of March and first week of April, have corrected such life threatening 'blocks', thus preventing a massive and potentially fatal 'Heart Attack'.

Dr.Vineet Sankhla began this "

Stenting. But there are more complicated and challenging situations where severe and complete blocks at several levels in the Coronary Arteries and its branches cannot be treated by Angioplasty.

Often these blocks are associated with extensive damage to long segments of the artery. These are correctable with one of the most effective, efficient and elaborate of Heart Surgeries-

The Coronary Artery Bypass Graft surgery, more famously known just as 'Bypass'. Two of them have challenging problems besides Coronary Artery Disease. One needs repair of a dilated and leaking Aorta, the body's biggest artery that pumps blood out of the heart. That complicated operation calls for installing new valves and providing a new wall to the Aorta with a synthetic graft. The operation takes several hours.

Each of these operations take several hours, and the entire team works from early in the morning throughout the day.

The other has a severely damaged heart muscle as well whose only hope of survival is a restored blood supply. Thus, at PIH, these two weeks are for 'Brave Hearts', of both patients, their families and their devoted doctors, nurses, and technicians.

Your heart is safe in our hands.
